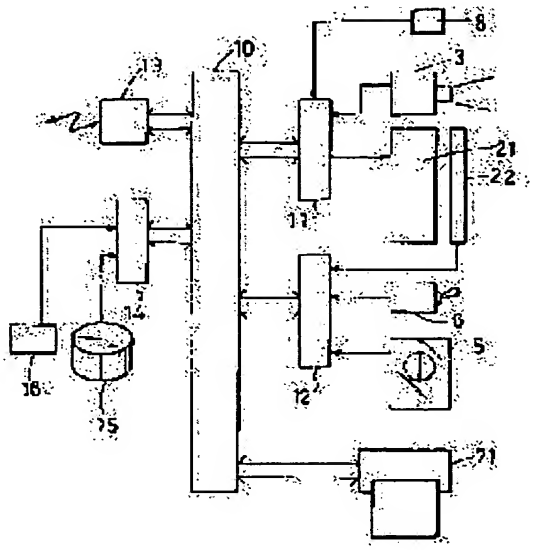
(54) IMAGE PROCESSING UNIT

(57)Abstract:
PROBLEM TO BE SOLVED: To add various image processing functions to the processing unit provided with a function of synthesizing an image photographed by a CCD camera with various background images and printing the synthesized image onto a seal.
SOLUTION: An image pickup means 3 is placed in an inside 11 of a self- standing case and photographs an object located in front of the case. A display means 21 is placed in front of the case and displays the photographed image. A storage means 15 stores a plural varieties of face parts images such as eyes and mouses. An image processing means 10 synthesizes the face parts image read from the storage means 15 with the photographed image at its a prescribed place and displays the resulting image onto the display means 21. A printer 71 prints out the synthesized image.



LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
